Profile

I have been coding for the last 7 years with Python and Javascript. Also, I have been scripting Linux servers and doing DevOps tasks. I am a creative thinker with a friendly and open-minded coworker attitude.

Experience

- **SIM Venezuela**
Full Stack Developer
June 2018 - August 2021
Sucre, Venezuela

- Accomplished the deployment and monitoring of all apps and API's developed for clients and internal developed products.
- Co-developed the Admin UI, for an in house product called DonDemand.
- Stimulated the use of Open Source tools for DevOps tasks to reduce cost and increase quality, using established free products like Sentry, Prometheus and Grafana.

Informal Experience

- **CryptoGame (Work In Progress)**
Entrepreneurship
October 2021 - May 2022
Venezuela

- Steered this development to become a Blockchain developer in the next months/year so this sustained effort is to build a game while learning Blockchain development technologies and concepts.
- Analyzed a possible lucrative game idea, and started learning and building the MVP while building a portfolio as plan B.

- **Memeplexes (Learning Practice — unfinished)**
Frontend Developer
February 2018 - April 2018
Sucre, Venezuela

- Designed a simple meme sharing website, as a learning practice of React.js

- **Softour (College project)**

Full Stack Developer

February 2017 - March 2018

Sucre, Venezuela

Sucre State Tourism platform for accommodations, transport and services publication and discovery by end users.

- Implemented modern technologies (by that time) like a NoSQL database and an Node.js API.

- **DolarTrabajado**

Entrepreneurship

December 2013 - March 2015

Sucre, Venezuela

- Diagnosed a possible lucrative business idea and reviewed best tools to learn and deliver the development task.

- Undertook the challenge of learning by myself, real world backend and frontend most used (by that time) development tools and techniques, like Django and Bootstrap.

- Accomplished the full MVP development (technical and business side). My first entrepreneurship, even when I could not afford to keep business going, because of Venezuelan crisis, the learning opportunity was worth it.

Skills / Tools

- **Backend**

Python: FastAPI, Django (60% mastered / 3 year exp.)

Javascript: Node.js, Express.js (70% mastered / 7 year exp.)

- **Databases**
